Caustic soda and **hydrochloric acid** are used in the manufacturing of **high fructose corn syrup** to regenerate systems designed to purify the syrup. Hydrochloric acid is also used as a process aid during the production of citric acid, soy sauce, gelatin, artificial sweeteners and **corn starch**. **Caustic soda** is used for fruit and vegetable processing, vegetable oil clarification and to make soybean-based protein. These foods are found either as products or ingredients in products in most grocery stores, restaurants and homes throughout the world.
